

# Customer Referral Program

## Your company gets rewarded for referring other customers to us...

### Concept

Telling a peer from another company about good and bad experiences your with vendors is something that happens every day. If your experiences with CoreIntegrator Solutions are positive, why not introduce CoreIntegrator to another company. If they agree to watch a demo of our software, your company will be rewarded for the referral. Customer referrals are the best types of business leads that a vendor can get, so CoreIntegrator created a program to track and reward client referrals, and referred leads that turn into new CoreIntegrator sales.

### Benefits

Your company saves money on software, services and maintenance when you refer a customer to CoreIntegrator. The referral can be used to enhance your value to your company.

### Program Highlights

- For each new customer you introduce CoreIntegrator to (considered a sales lead) your company will receive a \$250 credit on your next invoice for a new software purchase, services for a new workflow implementation, or on your annual support agreement.
- For each sales lead that turns into a CoreIntegrator solution sale, your company will receive an additional 25% discount on either a new software purchase, services for a new workflow implementation, or on your annual support agreement.
